

MIKHAIL RYMAREV

Product Engineer | Mobile, AI & Full-stack

Cancún, Mexico | Remote worldwide

+52 998 429 0726 · qqmikey@icloud.com · qqmikey.com · github.com/qqmikey

PROFILE

Product engineer with 12+ years of commercial software development since 2014. I turn ambiguous ideas, prototypes, and stalled codebases into products that can be launched, tested, and monetized. Hands-on across React Native, Flutter, iOS, web, Python/Django services, AI integrations, and delivery infrastructure. Experience as a founder, CTO, team lead, architect, and engineer lets me connect product goals to practical architecture and own the path to production.

WHY ME

SHIP Turn uncertainty into a focused plan, working software, and a production release.	CONNECT Work at the intersection of product, engineering, and business outcomes.
LEAD Set technical direction, strengthen a team, and remain fully hands-on in code.	OWN Cover the full path from mobile UX and backend architecture to deployment and metrics.

EXPERIENCE

Senior Software Engineer / Product Engineer

2022–2026

Remote product team

- Spent a year building and shipping Stars Align, a live React Native dating and social application, across feature delivery, product iteration, release work, and production maintenance.
- Delivered production Flutter features and Python services for consumer and FinTech products, including account connection, recurring-charge discovery, subscription management, and cancellation flows.
- Worked directly with product and business stakeholders to turn unclear requirements into practical scopes, architecture decisions, and releases while remaining hands-on throughout delivery.

Founder & Chief Technology Officer

2020–2022

Cishor / Seashore LLC

- Led a cross-functional team and connected product priorities with architecture, engineering plans, and delivery.
- Delivered mobile, web, backend, and connected-device products from discovery and technical design through deployment and support.
- Modernized legacy systems with React, Django, Swift, and scalable service patterns while staying active in implementation and review.

Team Lead

2019–2021

KF+

- Led engineers building mobile and web products with Flutter, React, and Django.
- Converted business goals into technical plans, reviews, and incremental releases while improving engineering consistency.

EXPERIENCE

Software Engineer KF - Built Python/Django backend systems and feature-rich iOS applications with Swift. - Worked directly with clients to adapt solutions to operational needs and existing infrastructure.	2017–2019
Software Developer Foundjob Developed backend and web solutions with Python, PHP, Swift, and JavaScript.	2014–2016

SELECTED PRODUCT WORK

COMMERCIAL · MY CONTRIBUTION Stars Align A production React Native dating and social product: feature delivery, product iteration, releases, and live-app engineering. REACT NATIVE · IOS · ANDROID	FINTECH · MY CONTRIBUTION Subscription Stopper Flutter and Python product flows that turn recurring charges into understandable actions and cancellation paths. FLUTTER · PYTHON · FINTECH
COMMERCIAL · MY CONTRIBUTION GiveMagix A location-aware community-giving product built as one mobile, backend, payment, and realtime system. FLUTTER · DJANGO · STRIPE	INDEPENDENT · BUILT END TO END Pulse Stack Analytics for seeing human focus alongside AI-agent work, from native collectors to dashboard, billing, and delivery. DJANGO · REACT · RUST
INDEPENDENT · PUBLISHED Figma A Figma-to-Jira workflow that turns links, screenshots, files, and review notes into structured Jira Cloud work. FIGMA · JIRA · NODE.JS	INDEPENDENT · APP STORES Inverto A minimalist mobile puzzle game with generated levels, hints, themes, progression, and complete store delivery. FLUTTER · GAME SYSTEMS

CORE CAPABILITIES

Product Discovery, technical strategy, system design, 0-to-1 delivery, monetization, analytics	Mobile React Native, Flutter, Dart, Swift, iOS, Kotlin, Android, cross-platform architecture
Backend & Web Python, Django, Flask, JavaScript, TypeScript, React, Go, REST APIs	AI & Agents AI product integration, agent workflows, natural-language interfaces, automation
Infrastructure Docker, PostgreSQL, Redis, CI/CD, Linux, production operations	Leadership Architecture reviews, mentoring, team leadership, stakeholder communication, planning

EDUCATION & DEVELOPMENT

Tyumen State University 2010–2013	Beeline School of Data Data Scientist program	TestDome Flutter Developer certification	Stepik Algorithms and Data Structures
